

Simple & Secure Online Voting for Cooperatives and Credit Unions

Our online voting solutions make planning and organizing any coop or credit union election or decision-making meeting simple and cost-effective, all while boosting member engagement.

Meeting Your Needs

Streamlined Events

Whether electing a new board of directors or conducting a member survey, our online voting solutions simplify every step of setting up and running any decision-making event so that even the most complicated is managed with ease. Votes are cast with just a few simple clicks, and results can be tabulated immediately.

Increased Participation

The core of coops and credit unions are their member base. Allowing all members to participate conveniently from anywhere, at any time, and on their own personal devices helps boost turnout and overall engagement in elections and decision-making processes, and can also help ensure your quorum requirement is met.

Transparency and Trust

Our online voting solutions help foster and preserve trust in both the electoral process and in leadership decisions by allowing voters to verify that their votes were correctly cast and counted. Each ballot is also protected by advanced encryption technology to guarantee its security and integrity.

KEY BENEFITS:

- **Full accessibility: Voting from any location, at any time**
- **Flexibility for all election, vote or ballot types**
- **Instant and accurate results**
- **Fully managed solutions with no software installation**

Our Solutions

Invite

Online Voting for Any Election

Invite ensures a streamlined and secure electoral process for elections of all kinds. Whether you are electing a board of directors or representative delegates, Invite guarantees efficiency at all levels, reducing costs and saving time every step of the way. Every Invite election is protected with end-to-end encryption and verifiability measures to ensure both the security and transparency of the voting process.

Meeting Manager

Live Online Voting for Decision-Making Meetings

Meeting Manager equips any decision-making meeting with a live online voting channel, allowing members or participants to cast votes on agenda items in real time, either in-person or remotely. Ballots are cast from members' personal devices and are always backed by secure encryption technology, and the entire system can be integrated with your preferred video conferencing solution.

KEY FEATURES:

**Multi-device
support**

**Voting
