

Simple & Secure Online Voting for Universities

Our online voting solutions make planning and organizing any university election or decision-making meeting simple and cost-effective, all while boosting participation.

Meeting Your Needs

Streamlined Events.

With numerous elections to various positions, separate voting populations, and decision-making meetings help by different groups, universities require efficient and flexible voting processes. Our solutions simplify every step of setting up and running an event so that even the most complicated is managed with ease.

Increased Participation

Any combination of students, faculty, staff, alumni or board members may participate in any given university election or decision-making process, and encouraging them all to vote in person can be difficult. Allowing voters to participate conveniently from anywhere, at any time, and on their own personal devices helps boost turnout and engagement.

Sustainable & Cost-Effective

Implementing an online voting channel for elections and decision-making meetings can also help meet sustainability goals while reducing overall costs. Printing and distributing ballots for every event is not only complicated, but also costly and heavily reliant on paper resources. Online voting eliminates this waste.

KEY BENEFITS:

- **Full accessibility: Voting from any location, at any time**
- **Flexibility for all election, vote or ballot types**
- **Instant and accurate results**
- **Fully managed solutions with no software installation**

Our Solutions

Invote

Online Voting for Any Election

Invote ensures a streamlined and secure electoral process for elections of all kinds. Whether you are electing a new university president, alumni association officers or governing board members, Invote guarantees efficiency at all levels, reducing costs and saving time every step of the way. Every Invote election is protected with end-to-end encryption and verifiability measures to ensure both the security and transparency of the voting process.

Meeting Manager

Live Online Voting for Decision-Making Meetings

Meeting Manager equips any decision-making meeting, such as alumni association or governing board meetings, with a live online voting channel, allowing members to cast votes on agenda items in real time, either in-person or remotely. Ballots are cast from members' personal devices and are always backed by secure encryption technology, and the entire system can be integrated with your preferred video conferencing solution.

KEY FEATURES:

**Multi-device
support**

**Voting
confirmation
receipts**

**Two-Factor
Authentication**

Vote encryption

**Digital
Signatures**

“Thanks to Scytl, our first use of online voting technology was a major success. Scytl’s solution and their team of experts went above and beyond to ensure that our election ran smoothly and was secure at every step.”
